

The beginnings

BCS came into being in the **1943** thanks to Eng. Luigi Castoldi, who designed and built a self-propelled motor-mower among the first units in the world, equipped with a low powered internal combustion engine.

In **1963** was founded MOSA, a company specializing in the production of machinery for the industrial sector.

At the **end of the sixties** BCS entered the field of the green maintenance machines by producing the first "light" multipurpose two-wheel tractors of small dimensions whereas only expensive and bulky machines existed until then.

Starting from **1970**, considered the request to increase the productivity in the agricultural field, rotary disc-mowers for tractors were included in the range of products.

In 1988 thanks to the merging with FERRARI, BCS entered the sector of the specialized tractors.

In **1999** the farming division of the Group was strengthened by the incorporations of Pasquali.

Those were the foundations on which BCS's growth was based: strong pillars that would lead to the current success of our Group, which keeps designing and building quality machines that satisfy the expectations of millions of customers.

In **2000** Engineer Fabrizio Castoldi, son of the founder, assumes his father's position on the Group's Management Board and becomes the new president of the Company.

BCS Group is a multinational company leader in the industries of agricultural mechanization and greens maintenance, represented by BCS, FERRARI and PASQUALI trademarks, as well as in the manufacturing of machinery for autonomous power generation and mobile welding, embodied by MOSA trademark.

FARMING AND GREENS MAINTENANCE DIVISION

The Agricultural Division of the Group, represented by the BCS, FERRARI and PASQUALI brands, is specialized in the development and manufacturing of special tractors, two-wheel tractors, motor mowers, mowers and greens maintenance machinery.

BCS operates in over 100 countries around the world, offering products and innovative solutions that satisfy the expectations of those who operate in the farming and grounds maintenance sectors, whether companies or individuals.

Company foundation year :

1943

Total area:

360.000 m²

Covered area:

120.000 m²

Employees:

800

Production centres:

- Abbiategrasso, Milano
- Cusago, Milano
- Luzzara, Reggio Emilia

Products:

Motor mowers, reaper-binders, two-wheel tractors, grass cutters and flail mowers, mowers and mower-conditioners for tractors, conventional tractors and short-wheelbase tractors with unequal wheels, isodiametric tractors, professional lawn mowers, generators, engine-driven welders and light towers

INDUSTRIAL DIVISION

MOSA

Focused on the design, manufacturing and marketing of power generators, portable engine driven welders and light towers, MOSA currently offers a wide range of machines that meet all the market needs for power generation and mobile welding.
